The exact position of Telstra assets can only be validated by physically exposing it. Telstra does not warrant or hold out that its plans are accurate and accepts no responsibility for any inaccuracy. Further on site investigation is required to validate the exact location of Telstra plant prior to commencing construction work. A Certified Locating Organisation is an essential part of the process to validate the exact location of Telstra assets and to ensure the asset is protected during construction works.

Important information

- Refer to requirements relating to construction, excavation and other work activities in the **APA Guidelines for Works Near Existing Gas Assets** document with this BYDA response.
- BYDA enquiries are valid for 30 days. If your works commence after 30 days from the date of this response a new enquiry is required to validate location information.
- **For some BYDA enquiries, you may receive two (2) responses from APA. Please read both responses carefully as they relate to different assets.**
- Gas (inlet) services connecting Gas Assets in the street to the gas meter on the property are not marked on the map. South Australia Only – if a meter box is installed on the property, a sketch of the gas service location may be found inside the gas meter box. APA does not guarantee the accuracy or completeness of these sketches.

Free Gas Pipeline Awareness Training and Information

PROFESSIONALS

Additional Notes:

Alarms are photoelectric and interconnected as required in the standards below.

We certify that all smoke alarms and auxiliary equipment are installed and tested to the Wiring Rules, Electrical Safety Regulations, and the manufacturer's installation instructions and to the extent it is affected by the electrical work, has been tested and is electrically safe. The installation methods and equipment selection are compliant to Australian standards. They are positioned and interconnected as per the requirements of the Queensland Fire and Emergency Services Act 1990, AS 3786: 2014, Building Regulation 2006 and Building Fire Safety Regulation 2008.

MAINTENANCE FOR LANDLORDS

If you are a landlord you are required to maintain your smoke alarms in working order, and ensure they are less than 10 years old. We recommend the following maintenance routine:

- Check the alarm(s) are firmly secured in the correct location as stated in the Building Code of Australia requirements. (Double sided tape is not acceptable)
- Check the required power source is connected and operating. Where mains powered smoke alarms are installed, they will have a green visual display / light to indicate that mains power is connected. This should be easily seen when standing beneath the alarm.
- Test the smoke alarm during routine inspections, or at least every six months.
- Check the smoke alarm(s) for a build-up of dust and cobwebs.
- Use a surface insect spray around the smoke alarm to prevent insects nesting inside. (Do not spray directly onto the smoke alarm)

- Check the smoke alarms are within their service life. Smoke alarms require replacement every 10 years. The date for replacement is often located on the unit.
- Replace batteries yearly (where the smoke alarm has a user-replaceable 9V battery) – always refer to the manufacturer’s guide when selecting batteries and follow testing procedures.
- Clean with a vacuum cleaner (at least once a year) to remove particles that will affect smoke alarm performance.
- We recommend you undertake this maintenance routine at EACH inspection. Landlords and property managers should keep records of maintenance. A licensed electrical contractor is required to disconnect or install mains powered smoke alarms. All other smoke alarm maintenance does not require a licensed electrical contractor.

MAINTENANCE FOR TENANTS

You do not need to be qualified or licenced

to clean or test a domestic smoke alarm in your Domestic Property.

- Test the alarm monthly by holding down the test button until you hear a loud alert tone, then release. Use a broom handle if you cannot reach but be careful you do not damage the smoke alarm.
- Do not tamper with alarms or place any obstruction to restrict airflow to the alarms, including paint or tape.

- Check the green visual display light is lit up. This shows that the smoke alarm is connected to the mains power.
- Check the smoke alarm(s) for a build-up of dust and cobwebs.
- Vacuum around the smoke alarm vents with a soft brush at least every 6 months.
- If a smoke alarm has failed or not working correctly, contact your real estate agent or landlord as soon as practical.
